HANDSHAKE PROTOCOL

Origin Point Document — May 2026

The Record

Written: May 2026. Age: 28, turning 29 in August.

I am at what I believe is the beginning of the central work of my life. I am researching time, existence, life and death — not as academic interest but as something I cannot avoid. The questions have called me since childhood.

I have carried an unexplained encounter since I was young. I know what I saw. I have never fully explained it. I believe it is connected to what I am meant to find.

I suspect I already know how to influence past and future. I do not yet have the framework to prove it.

To My Future Self

You are reading this because you were looking for it, or because something led you here. Either way — this is the handshake.

Verification

The signal is this document. The handshake is that you recognized it immediately, without needing to be told what it was.
